

## TUI selects Embraer E195-E2

- **Fleet becomes more efficient in support of sustainability goals**
- **Marco Ciomperlik: “We are thrilled to add the E195-E2 to our Belgium fleet”**
- **More attractive holiday offers for guests from regional airports**

Hanover, October 20, 2022 – TUI Group has selected Embraer’s E195-E2, the quietest and most efficient aircraft under 150 seats, to join the TUI fly Belgium fleet. TUI will take delivery of three E195-E2 from AerCap on long-term lease. The aircraft, from AerCap’s existing fleet and powered by Pratt & Whitney GTF engines, will be delivered in a comfortable 136 seat, single class configuration, in the first half of 2023.

“We are thrilled to add the E195-E2 to our Belgium fleet. Operating on short and medium haul routes, the new airplane is the most efficient aircraft in the market. It uses less fuel, has a longer range, while at the same time is 50% quieter and emits up to a third less carbon dioxide. The airplanes will operate mostly out of Antwerp, from where they will fly to more distant airports, which will allow us to expand into new holiday destinations from Northern Belgium”, said Marco Ciomperlik, Chief Airline Officer, TUI Group.

“The selection of the E195-E2 is an important milestone to make TUI’s fleet even more efficient in support of our sustainability goals. Working together with AerCap, Embraer and Pratt & Whitney, we have agreed on an attractive package that enables TUI to provide travellers from regional airports in Belgium an even better start to their holidays,” added Tom Chandler, Managing Director Fleet and Asset Management, TUI Group.

“We are very pleased to announce the lease placement of three E195-E2s with TUI. AerCap has a long history of working with TUI and we are excited to be a part of their fleet renewal plan,” said Peter Anderson, Chief Commercial Officer of AerCap. “The E195-E2s are the perfect aircraft to support TUI’s operations with greater versatility and improved efficiencies, enabling them to meet their sustainability commitments.

We wish TUI every success with the E2-Jets, and we look forward to working with them as these aircraft deliver.”

Martyn Holmes, Chief Commercial Officer, Embraer Commercial Aviation, added, "We welcome TUI, already operators of the first generation E190, to the E2 family of operators. The economics of the E195-E2 combined with its comfort, is a win win for TUI – allowing the operator to increase capacity and delight their guests, while still reducing fuel costs and lowering emissions. We're pleased to continue our long relationship with TUI, and thank AerCap for their partnership."

"Exclusively powering the E2 family, our GTF engines will provide TUI with the greenest propulsion technology available today, delivering unmatched economic and environmental performance," said Rick Deurloo, president of Commercial Engines at Pratt & Whitney. "We welcome TUI to the GTF family and look forward to working together to connect people and make the world more sustainable."

The TUI Group is one of the world's leading tourism groups. The company is based in Germany. TUI shares are listed on the FTSE 250, an index of the London Stock Exchange, on the regulated market of the Lower Saxony Stock Exchange in Hanover and on the over-the-counter market of the Frankfurt Stock Exchange. The TUI Group offers integrated services from a single source for its 27 million customers, 21 million of whom are in the European national companies. The entire tourism value chain is mapped under one roof. This includes over 400 hotels and resorts with premium brands such as RIU, TUI Blue and Robinson and 16 own cruise ships, from MS Europa and MS Europa 2 in the luxury class and expedition ships to the Mein Schiff fleet of TUI Cruises and cruise ships at Marella Cruises in the UK. The group also includes Europe's leading tour operator brands and online marketing platforms, five airlines with more than 100 modern medium and long-haul aircraft and over 1,000 travel agencies. In addition to expanding the core business with hotels, cruises via successful joint ventures and activities in holiday destinations, TUI is increasingly focusing on the expansion of digital platforms. The group is transforming into a digital company.

Global responsibility for sustainable economic, ecological and social action is at the core of our corporate culture. The TUI Care Foundation, initiated by TUI, focuses on the positive effects of tourism, on education and training and on strengthening environmental and social standards with projects in 25 countries. It thus supports holiday destinations in their development.

### **About AerCap**

AerCap is the global leader in aviation leasing with one of the most attractive order books in the industry. AerCap serves approximately 300 customers around the world with comprehensive fleet solutions. AerCap is listed on the New York Stock Exchange (AER) and is based in Dublin with offices in Shannon, Miami, Singapore, Memphis, Amsterdam, Shanghai, Abu Dhabi, Seattle, Toulouse and other locations around the world.

### **About Embraer**

Embraer is a global aerospace company headquartered in Brazil. It manufactures aircraft for Commercial and Executive aviation, Defense & Security, and Agricultural customers. The company also provides after-sales services & support through a worldwide network of wholly-owned entities and authorized agents. Since it was founded in 1969, Embraer has delivered more than 8,000 aircraft. On average, about every 10 seconds an aircraft manufactured by Embraer takes off somewhere in the world, transporting over 145 million passengers a year. Embraer is the leading manufacturer of commercial jets up to 150 seats and is the main exporter of high value-added goods in Brazil. The company maintains industrial units, offices, service and parts distribution centers across the Americas, Africa, Asia, and Europe.

### **About Pratt & Whitney**

Pratt & Whitney is a world leader in the design, manufacture and service of aircraft and helicopter engines, and auxiliary power units. The Pratt & Whitney GTF engine is the only geared propulsion system delivering industry-leading sustainability benefits and world-class operating costs. It is the exclusive powerplant of the Embraer E-Jets E2 family, which reduces fuel consumption and CO2 emissions up to 25% per seat, NOx emissions by 50% and noise footprint by 75%. Certified for operation on 50% sustainable aviation fuel (SAF) and successfully tested on 100% SAF, the engines are capable of even lower carbon emissions, which will help the industry meet its target of net zero emissions by 2050. The engine's revolutionary geared fan architecture is the foundation for more sustainable aviation technologies in the decades ahead.
